Want to know more about Visual Building Regulations?

Sign up for our FREE multidisciplinary online built environment CPD course using an applied interactive visual building regulation pedagogy

Domestic Stairs

A holistic evaluation of the design, construction and use of domestic stair Irish building regulation requirements and best-practice

Are you working as a contractor, sub-contractor, consulting engineer, architect, architectural technologist or building surveyor and want to know more about visual building regulations? Are you an educator, researcher, academic or postgraduate student and would like to learn more?

Sign up for our FREE multidisciplinary online course today!

Flexible, distance, mobile learning.

Start date: March 2019

3 hours CPD at level 9 (Irish National Framework Qualification). The online course is suitable for CPD purposes for those working in AEC or the BE.

This pilot course has a limited number of places for each discipline and role. Research will be conducted in conjunction with Lancaster University Educational Research Department. The research elements are separate from the course material and are not a requirement for participation.

Why learn about visual building regulations online?

'It's easy to absorb information by seeing an image or a film clip as opposed to reading a long passage of text.'

'Interactive learning is fun. Regulation papers aren't necessarily suited to everyone. For people who get lost in text like myself, visual, interactive aids help.'

'Very effective, "a picture paints a thousand words". Very descriptive and easy to follow.'
